

#218 HIGH GLOSS FLOOR FINISH

This product combines the very best features one would want in a floor finish. It dries to a brilliant gloss and can be spray buffed, dry buffed, or not buffed at all. Multiple coats of this finish will give a depth of gloss that is truly magnificent. It has excellent detergent resistance and can be cleaned with a neutral detergent without dulling the gloss or removing the finish. When complete removal is required, this can be done effortlessly with a good manufacturer recommended stripper. This versatile finish responds well to standard speed floor machines, as well as the high speed and ultra high speed burnishers. The metal interlocked polymer resins dry water clear and will not yellow with age. Other features of this product worth noting are its excellent scuff and scratch resistance, black heel mark resistance and powder resistance. It will adhere to vinyl, vinyl asbestos, linoleum, terrazzo, marble, concrete, sealed wood or cork, slate, as well as most other floor polishes. From the very first coat the floor is protected and beautified. Each additional coat improves the "water wet" shine. It is classified as highly slip resistant and therefore safe for hospitals, nursing homes, schools and other public, high traffic areas.

SPECIFICATIONS

Total Solids.....	18.5 ± .5 ASTM D1289-64
pH	8.8 ASTM E70-68
Sediment.....	Less than 0.1% by volume ASTM D1290-57
Coverage	2,000 - 2500 sq. Ft. Per gallon
Application	Free flowing liquid, no streaks, ASTM D1436-64
Gloss	Excellent, ASTM D1455-64
Water Resistance	Excellent, ASTM D1793-66
Storage Stability	12 month minimum, no deterioration
Powdering.....	None
Slip Resistance	Excellent, ASTM D 2047-64
