

TIRE CLEANER

Heavy Duty Powdered Cleaner

This highly active granular product is designed for quick, effective cleaning of white wall tires, black wall tires, wheel and hubs. It will effectively remove dirt, grease, road film and other such soils with little or no manual scrubbing required. This material is a blend of strong cleaning agents, including wetting agents, soil penetrants, emulsifiers and chelating agents. It does not contain any harsh caustics that can have a damaging effect on rubber.

This product is highly concentrated and will handle most soils when diluted 2 to 4 ounces per gallon of water. If extreme tire stains or heavy grease is a problem increase solution strength to 6 to 8 ounces per gallon of water. Apply directly to tire, wheel or hub with a brush or low pressure sprayer. Let solution soak for several minutes then wash off with a high pressure wand at close range or with pressure water hose while brushing lightly to aid in the removal of loosened soil. This product will work extremely well on tough curb marks if you wet the tire with your solution and agitate with a brush. Rinse off before solution can dry on tire. The rinsability of this material is excellent and will leave no film.

This product can also be used as an engine degreaser or concrete cleaner to remove heavy grease and oil. This product is not recommended for use as an "all over" vehicle wash.

SPECIFICATIONS

Appearance	Dust Free Granules
Color	Yellow-Orange
Color 1% Solution	Fluorescent Green
pH	12.4
Solubility	100%
Actives	100%
Foam	Excellent
Rinsability	Excellent
