

CLING SAFE

This formulation of phosphoric acid, surfactants, penetrants, deodorizers and whitening agents, provides exceptional cleaning capabilities. Use it with confidence on sinks, tubs, showers, urinals and commodes. It works to dissolve mineral deposits, soap scum, body oils, and other soils commonly found in restroom and shower maintenance. The unique properties of this cleaner also aid in the removal of mold and mildew from tile and grout.

Unlike “hot” acids, this product will not blacken or tarnish your bright metals. Use it with confidence on your stainless steel, chrome and polished aluminum fixtures and water fountains. The viscous nature allows it to remain on a vertical surface longer, giving it time to penetrate and dissolve heavier soils.

SPECIFICATIONS

Type of Product	Phosphoric Acid Complex
%Acid	20%
ColorGreen
Fragrance	Sassafras
pH	Acidic
Solubility	100%
Flash Point	None
Viscosity	550 ± 20 cps at 70° F
