

CONCRETE CLEANER

This powdered compound is a free flowing, dust free product. It is designed for use in cleaning dirt, grease, oil and other similar soils from concrete surfaces. Effective in cleaning warehouse floors, driveways, garages, machine shops or wherever heavy automotive or pedestrian traffic soils accumulate. This product contains special penetration and emulsification properties which help insure the removal of dirt, grease and oil from concrete.

Apply this product to a wet floor. Sprinkle the cleaner evenly on soiled area. (Remember light applications work better than heavy applications.) Allow the cleaner to work on the surface for a few minutes. When possible use a stiff broom or brush to scrub the soiled area and allow the cleaner to remain for a few minutes after agitation. Follow with a thorough rinse.

SPECIFICATIONS
