

ECONO-SOLV

Industrial Cleaner - Degreaser

This product is a non-flammable, water-soluble degreaser that exhibits highly efficient soil removal and degreasing capabilities in a wide variety of cleaning operations. This multipurpose cleaner is designed for removing grease, oil, wax, animal and vegetable fats, dirt and other soils, from all washable surfaces. By incorporating water-soluble solvents into surfactants, wetting agents, emulsifiers and alkaline builders, we offer a product that fits very well into industrial and institutional cleaning operations. Because of its cleaning ability and relatively low foam, this product works well in automatic scrubbers and pressure spray systems, as well as bucket and brush or mop applications. It contains no harsh solvents, caustics or acids and can be used safely on all types of surfaces. Use it with confidence to clean floors, walls, stoves, vents, vehicles, equipment, tools, parts and machinery. Dilution will vary with the cleaning problem and the method of cleaning. A little experimentation with the product will identify the best use dilution for your type of soil and cleaning method. The following dilutions are recommended starting points:

Light Soils	1 – 2 ounces/gallon
Medium Soils	4 – 8 ounces/gallon
Heavy Soils	8 -12 ounces/gallon
Extreme Soils	16 – 24 ounces/gallon

Specifications

Appearance	Clear, Red Liquid
Fragrance	Characteristic, Non-offensive
PH Concentrate	12 ± .5
Water Solubility	100%
Flash Point	None
Freeze/Thaw	Stable
