

URETHANE FINISH 40%

For Gymnasiums and Wood Floors

This product is among the finest quality gymnasium and wood floor coatings on the market. The unique polyurethane contained in this product produces a tough, durable film that dries to a brilliant gloss. Designed for gymnasium floors, hardwood floors, stage floors and similar wood surfaces where gloss and wear are important. This is a solvent based product and should be applied with a flat applicator. Due to the high solid content of this coating, further dilution with a proper thinner may be necessary to apply it using spray equipment. Coverage is usually 500-700 square feet per gallon with a drying time of 3-8 hours. Dry time is influenced by temperature, humidity and air movement. This product should be used by experienced personnel only.
